Fresnel Lens: Functional Illustration

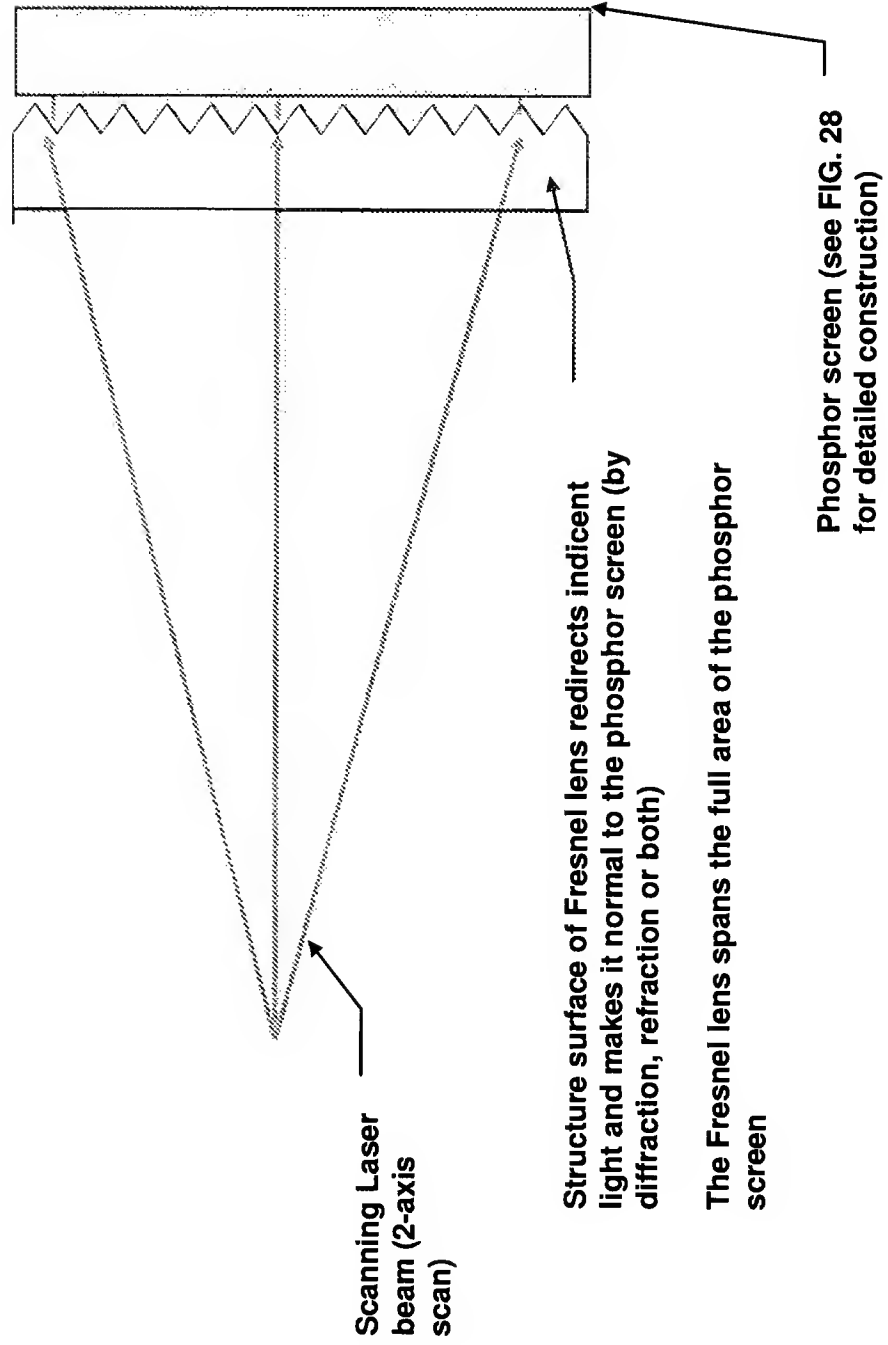

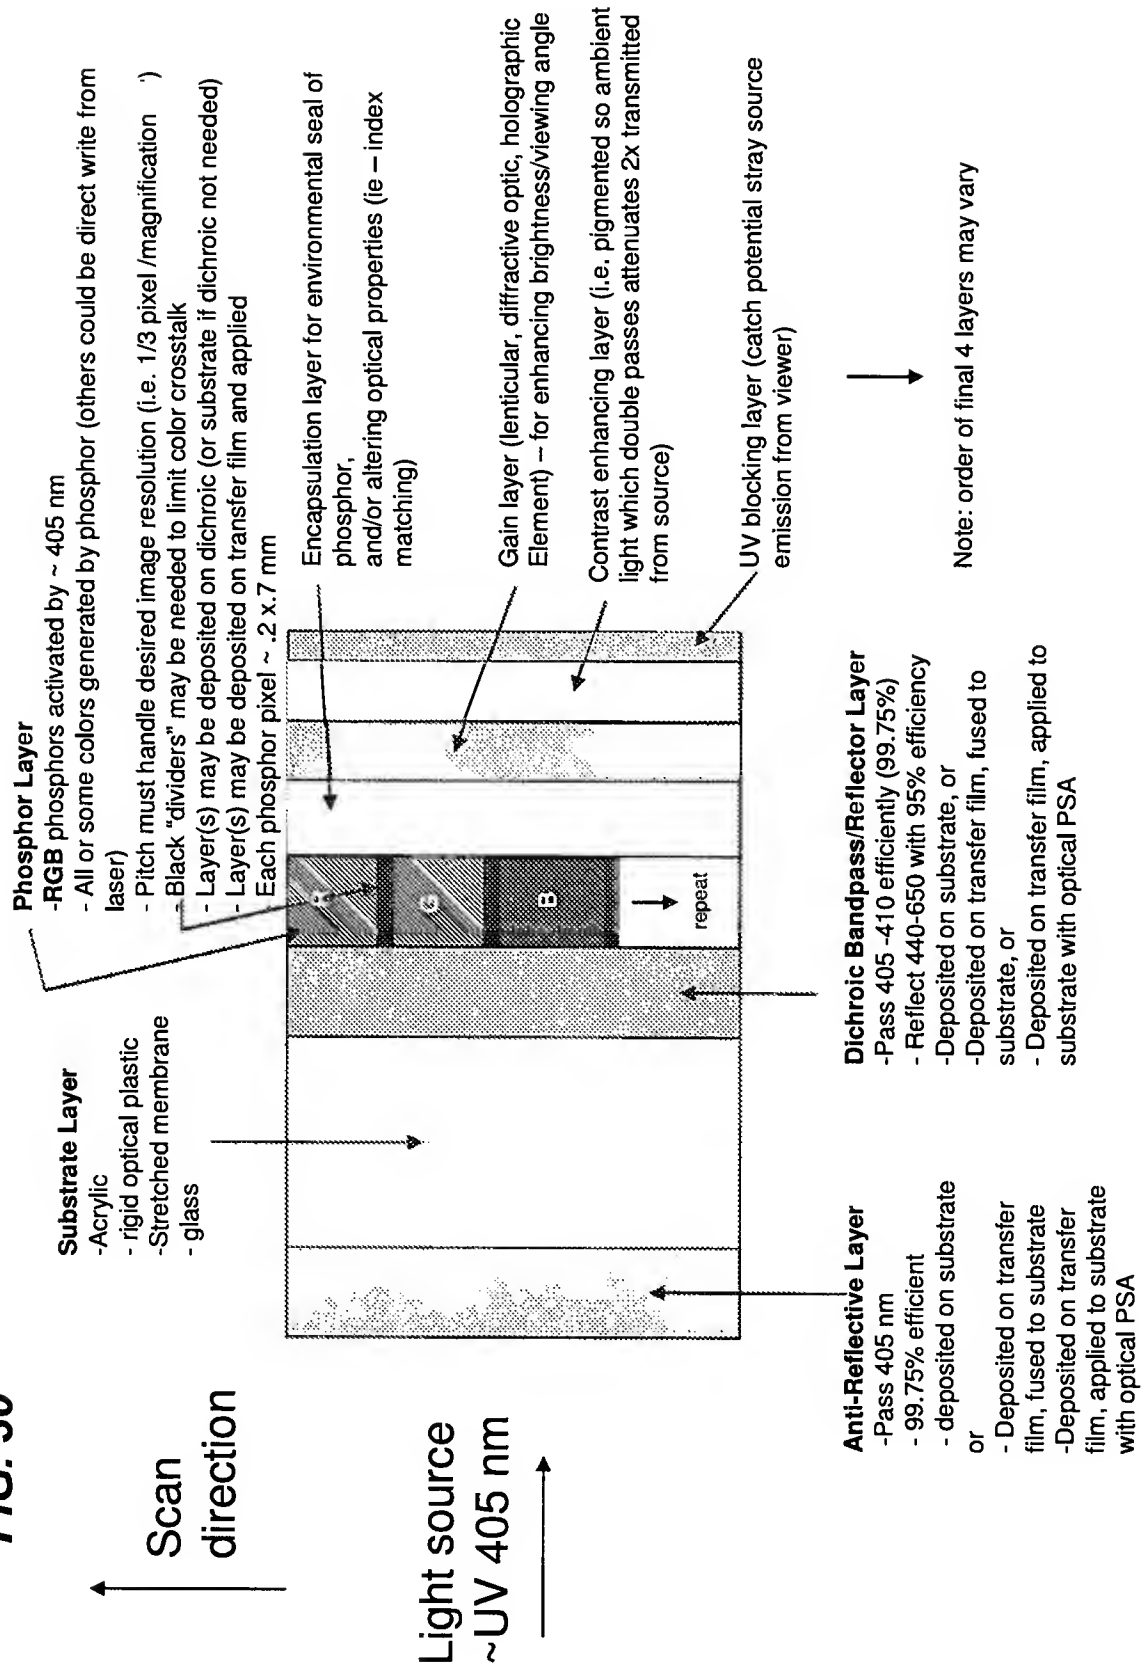

FIG. 30

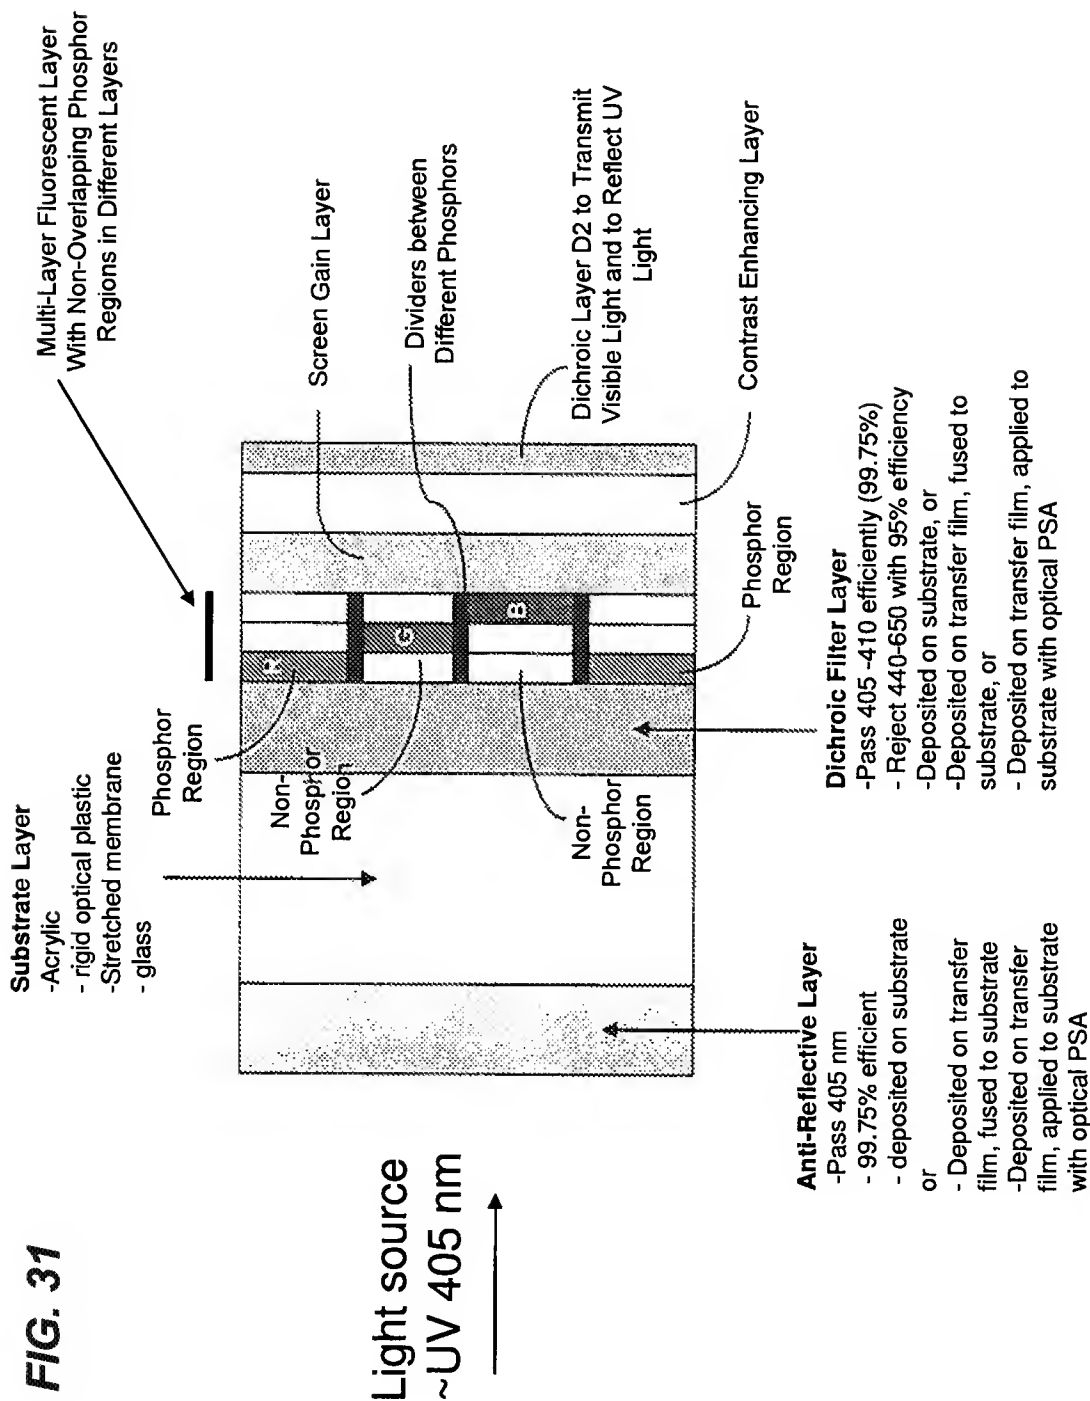

FIG. 32

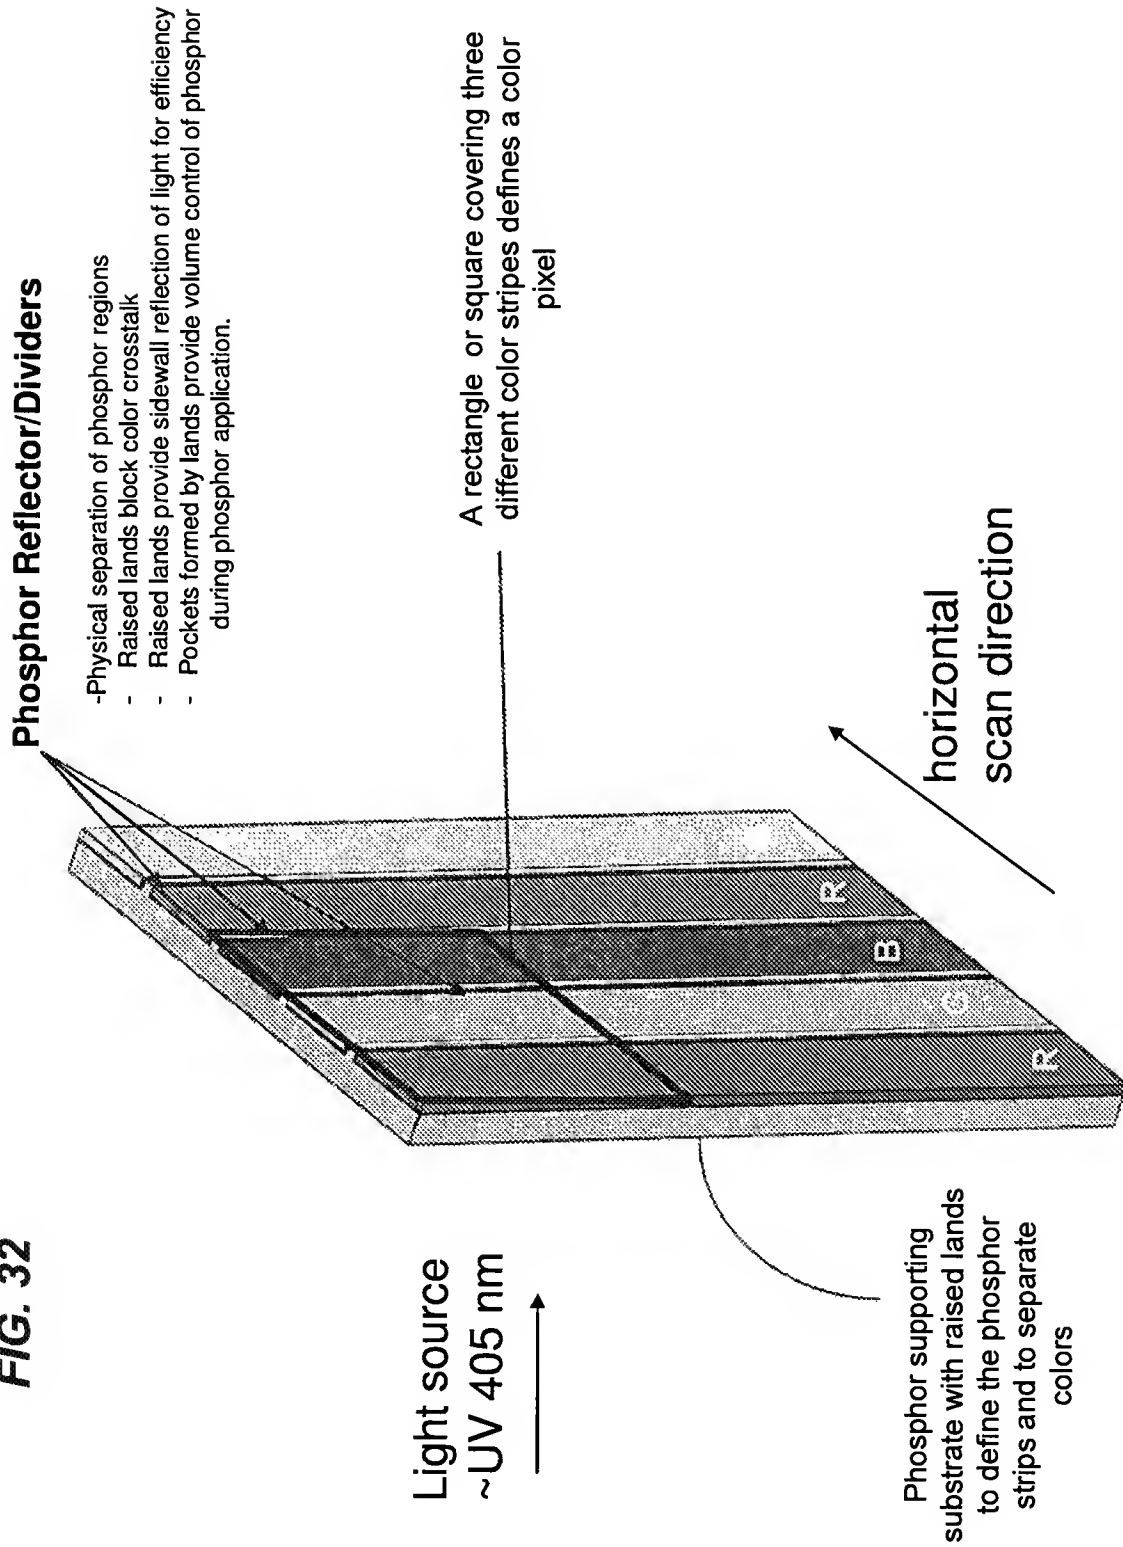

FIG. 34A

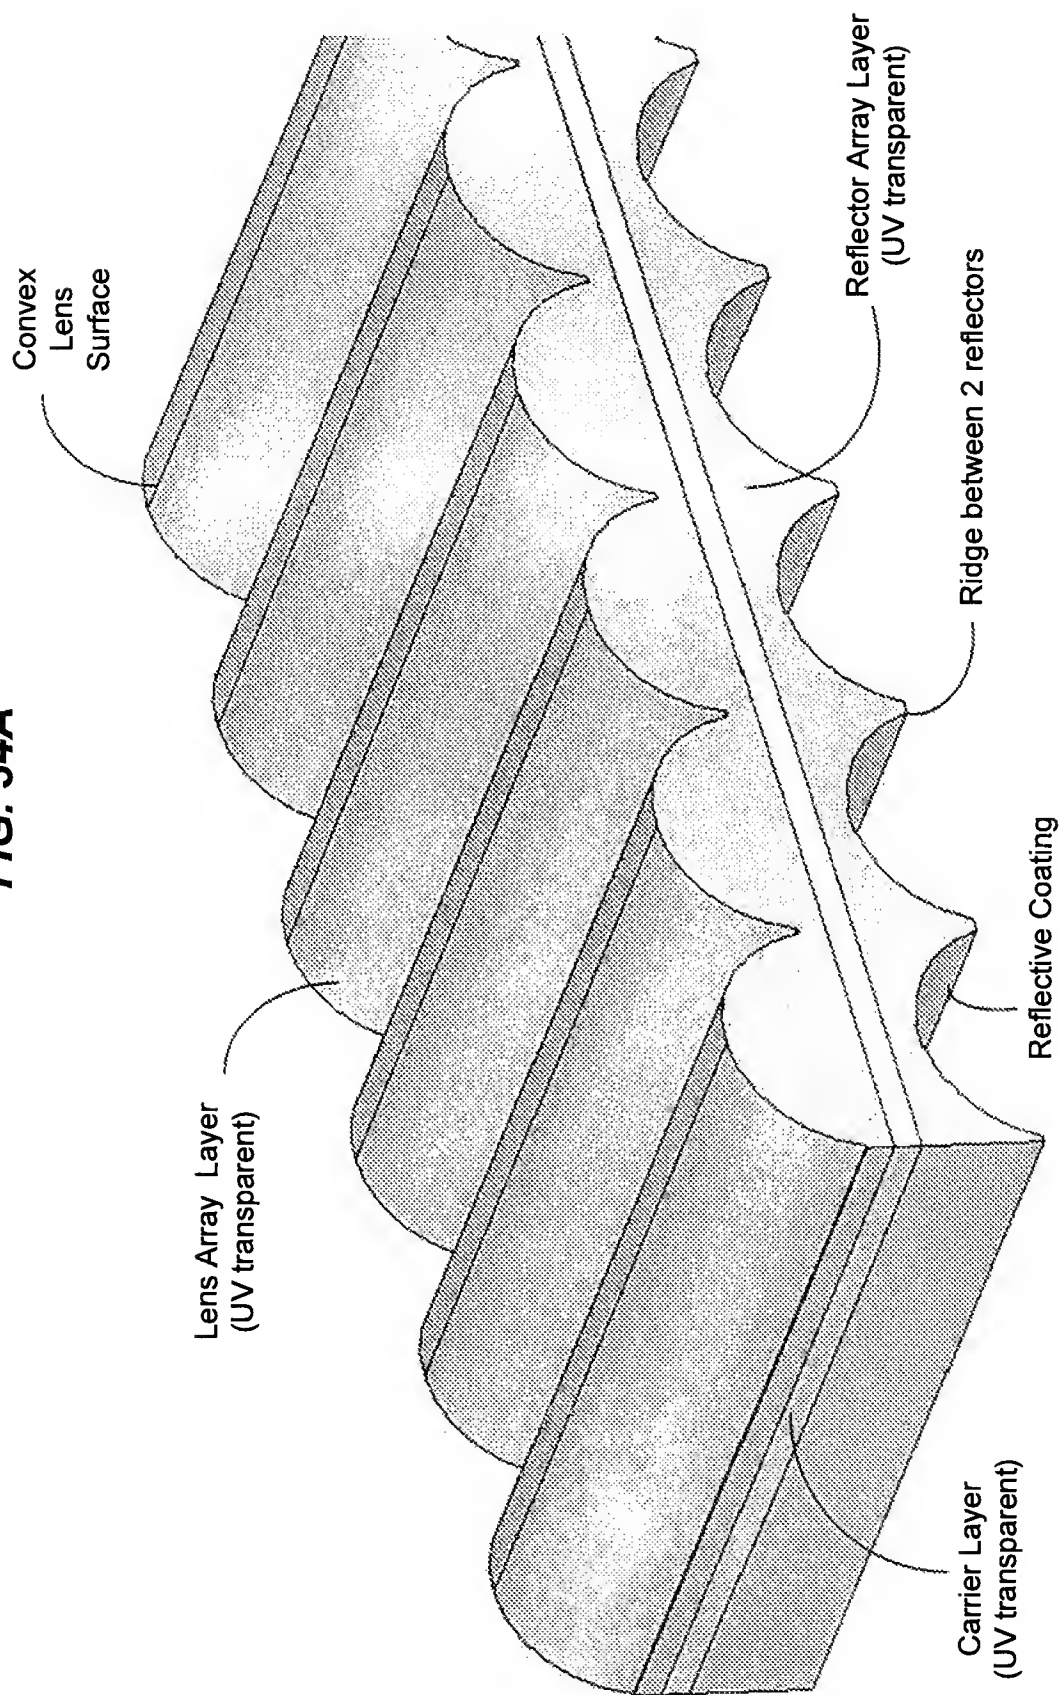

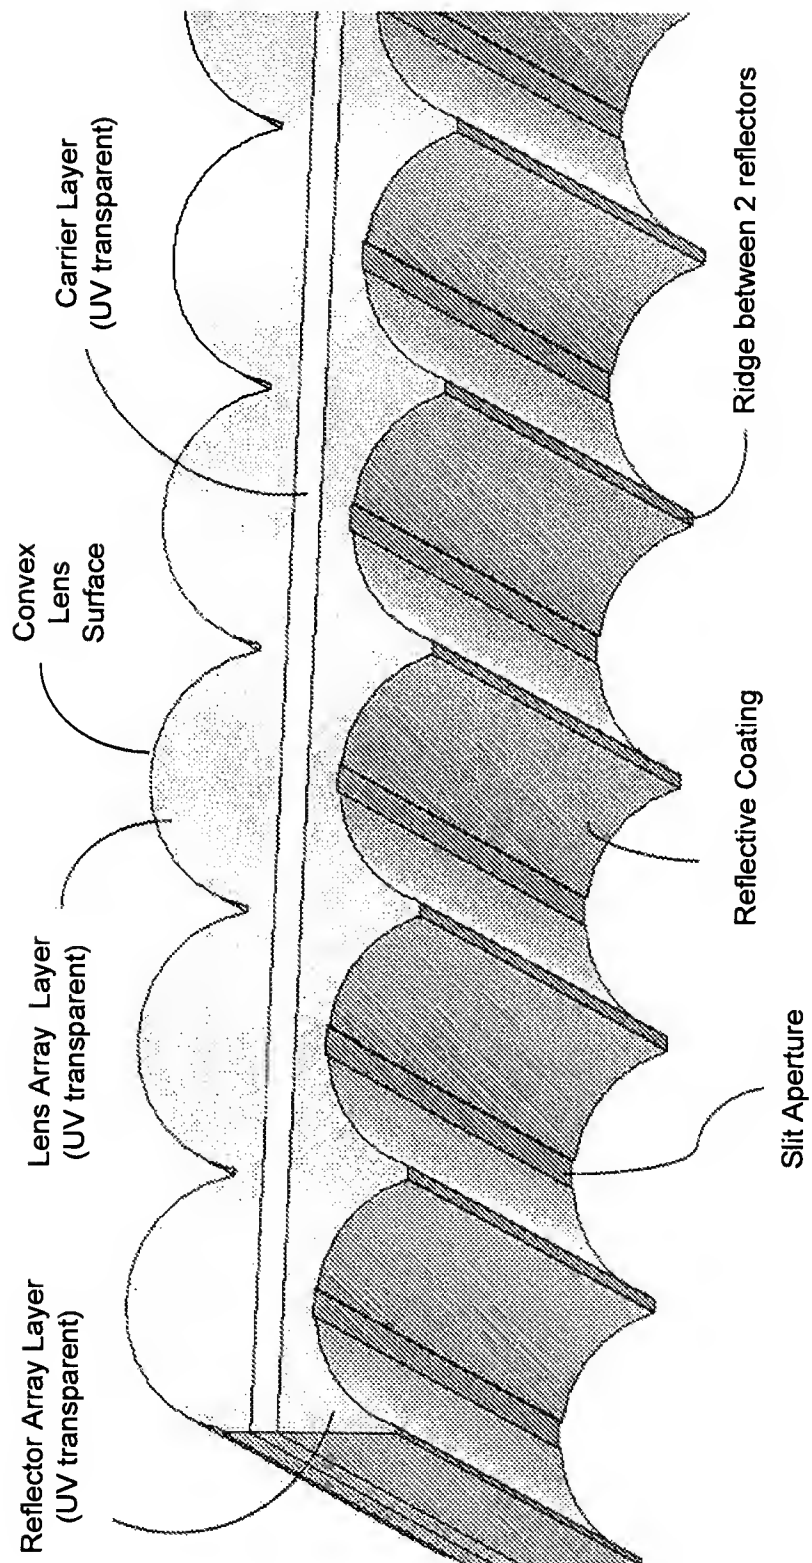

FIG. 34B

A schematic diagram of a lens array structure. At the top, five vertical arrows labeled "Exposure Light (e.g., UV)" point downwards. Below them is a "Lens Array Layer" consisting of five semi-circular lenses. A horizontal "Carrier Layer" is positioned below the lenses. Underneath the carrier layer is a "Reflector Array Layer" with five semi-circular reflectors. Light rays from the exposure light pass through the lenses, reflect off the reflectors, and converge at a point on the carrier layer, labeled "Exposed Photoresist at Focus Location". The areas on the carrier layer between the focus points are labeled "Unexposed Photoresist outside Focus Location".
